

We have a fundamental responsibility to ensure that all employees work in safe and healthy environment. It is our policy to comply with all the current law and regulations pertaining to safety and health.

The management, together with the employees, will take every measure to prevent work related injuries and illnesses, fire hazards and accidents.

Each employee plays an important role in the safety and health aspects. Everyone must be fully committed in giving his assistance and cooperation in the reporting of all accidents as well as any hazards, which would have the potential to cause accidents or illnesses.

To achieve an accident free status in our business operation, we emphasize strongly on the need to provide training, adopt safe working practices and maintain good discipline.

This application of this Safety and Health policy will be of prime consideration in the Management of the company.
